# Colocar el enemigo al mapa y agregarle un "Circle Collider 2D"

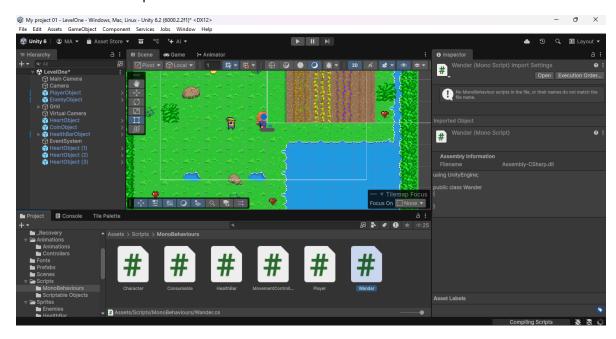

Configura:

Radius: 1

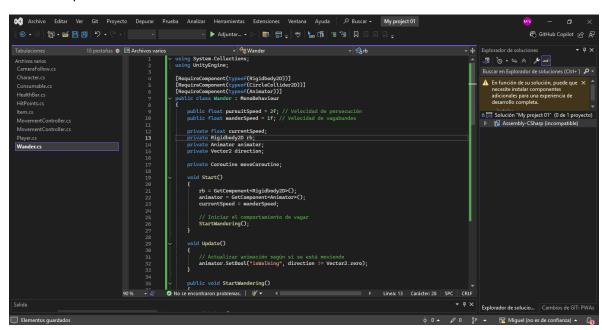

☑ Is Trigger: Activado

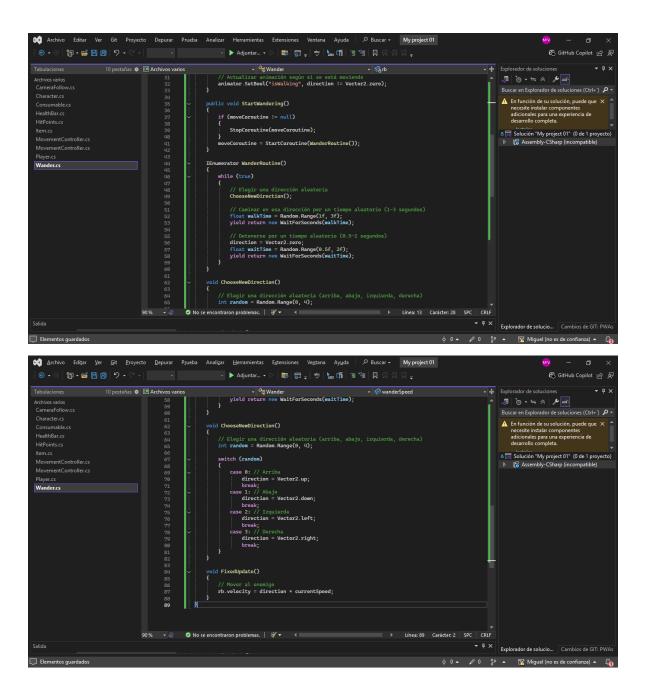

# Se crea un nuevo script "Wander.cs"

#### Y vamos a poner esto

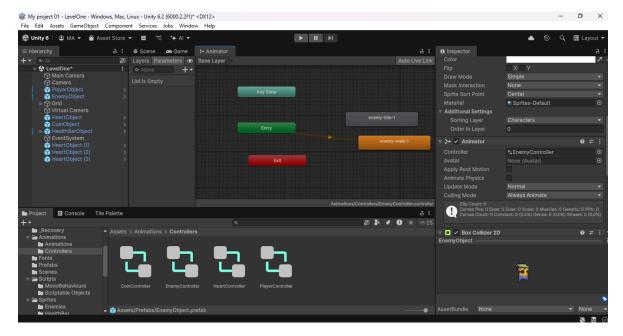

Selecciona EnemyObject Prefab en la carpeta Prefabs

En el Inspector, busca el componente Animator

Haz doble clic en el Controller (probablemente se llama algo como "EnemyController")

Se abrirá la ventana Animator

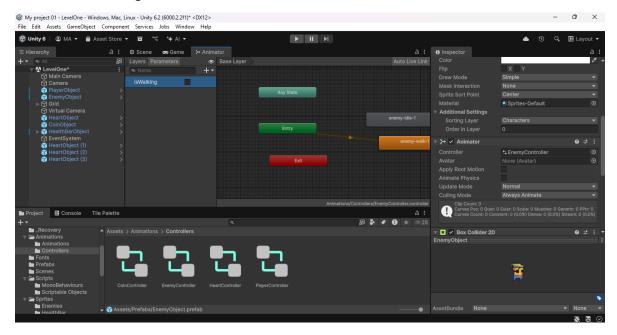

En la ventana Animator, busca la pestaña Parameters (lado izquierdo)

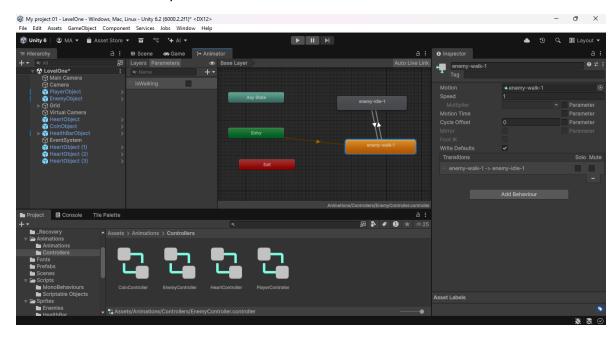

Haz clic en el símbolo +

Selecciona Bool

Nómbralo "isWalking"

### Transición de Idle a Walk y de Walk a Idle:

En el Inspector, configura: ☐ Has Exit Time: Desactivado, ☐ Fixed Duration: Desactivado

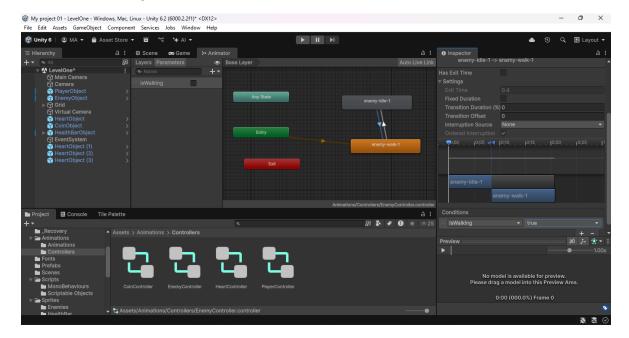

Transition Duration: 0

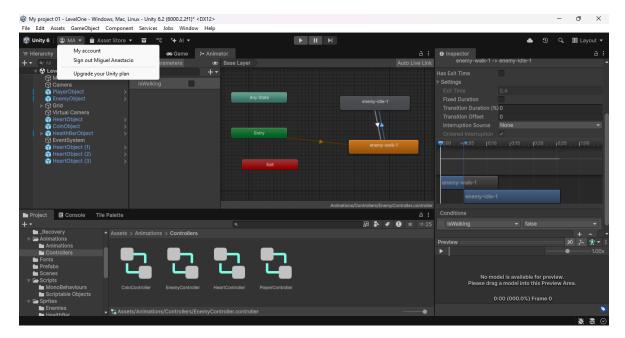

En la sección Conditions (abajo):

Haz clic en +

Selecciona isWalking

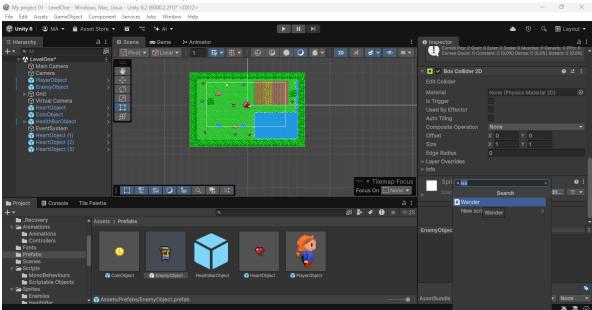

Debe decir is Walking = true

# Selecciona EnemyObject Prefab en la carpeta Prefabs

### Arrastrar a varios enemigos en el mapa
